## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kishine et al. (US 6,063,871).

The reference discloses in Examples 2, 4 and Comparative Example 1 a polymer composition having claimed features (i), (ii) and (iv) (see also Table 1). Use of the disclosed resins for pipes, bottles and blow moldings are suggested at col. 15, lines 34-42. The reference has not reported Ea. However, this feature would appear to be inherent in view of the following: (a) since Ea is unreported, it can reasonably be concluded that the value would be in the conventional range; (b) US 7,205,358 states that conventional linear ethylene/alpha olefin copolymers have Ea of 35 kJ/mol or lower (see col. 4, lines 1-10); and (c) applicants have claimed virtually the whole of this conventional range of Ea. The burden of proof is shifted to applicants to show that the reference examples do not include the claimed value of Ea.

Art Unit: 1713

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.
